**(54) METHOD FOR BIDDING FOR LICENSING OF
PATENT RIGHT OR THE LIKE**

(57) Abstract

PROBLEM TO BE SOLVED: To provide a contract method for maximizing the possibility of proper licensing of patent, etc., by introducing a market mechanism (competition principle) when concluding the license contract of intellectual property right such as patent right so as to properly select a licensee with implementing capacity and so as to make the contracted licensee take proper responsibility.

SOLUTION: A prospective licensing amount P_k during a prescribed period T after contract $k-1$, $k=1, \dots, N$ and a contract temporary money (initial payment) X_k and a contract royalty rate (turning royalty) Y_k ($k=1, \dots, N$) are presented from each applicant. It is desirable to fix the lowest limit price to the contract temporary money and/or the licensing rate in advance.
